# SUBJECT INDEX

N-acetyl-aspartyl-glutamate - effect of lesions on distribution, 593
N-acetyl-aspartyl-glutamate - in rat brain, 593
acetylcholine content - effect of 6-aminonicotinamide, 159
acetylcholine metabolism - effect on vesamicol, 559
acetylcholine release - from rat amygdala slices, 543
acetylcholine - elevation of $[Ca^{++}]_i$, 74
acetylcholinesterase binding sites - 125
acetylcholinesterase - glycolipid domain, 51
acetylcholinesterase - in Electric eel, 537
acetylcholinesterase - involvement of phosphatidylinositol, 51
acetylcholinesterase - protease activity, 537
adrenal chromaffin cells - release of catecholamines 71,81
age-related changes - in expression of glutamate transporter, 243
allergic encephalomyelitis - clinicopathological responses, 213
allergic encephalomyelitis - immunochemical responses, 213
allergic encephalomyelitis - in animals, 213
6-aminonicotinamide - effect on acetylcholine content, 159
amines - in neuronal differentiation, 2
amino acids - in neuronal differentiation, 2
ammonia - effect on energy metabolism and intracellular pH, 495
AMPA receptors - in chronic hepatic encephalopathy, 511
$^3$H-AMPA binding - in cerebellum, 511
antibodies - to 5-$HT_{1a}$ receptors, 413
antidepressants - effect on glutamatergic system, 247
antidepressants - effect upon $^3$H-MK-801 binding, 247
astrocytes - uptake of sulphur-containing amino acids, 467
astrocytes - effect of neurotransmitters, 6
astroglial cells - characterisation of gangliosides, 227
autophosphorylation - calmodulin-dependent protein kinase II, 271
aziridinium ion - cholinergic toxin, 113

binding of $^3$H-minaprine to brain slices, 335
binding - of $^3$H-paroxetine, 42
$^{125}$I-Bolton-Hunter-8-methoxy-2-(N-propyl-N-propylamino)tetralin - ligand to localise 5-$HT_{1a}$ receptors, 426
n-butyl-β-carboline-3-carboxylate - uptake into cerebral cortex, 567

calcitonin gene-related peptide - fragmentation, 341
calcium binding protein - calretinin, 517
calcium - internal stores, 75
calcium/camodulin-dependent protein kinase II, 271
$[Ca^{++}]_i$ - elevation by various substances, 74
calmodulin-dependent protein kinase II - modulated by ganglioside GMI, 271
calretinin - in rat brain, 517
calretinin - radioimmunoassay, 517
carbon dioxide - effect on inositol monophosphate levels, 327
castration - reduced mRNA pituitary protein 7B2, 103
catecholamine release - effect of C-AMP, 71
catecholamine release - from adrenal medulla, 71,81
catecholaminergic mechanisms - in hypothalamus, 261
cerebellum - localisation of 5-$HT_{1a}$ receptors, 425

cerebellum - noradrenaline content, 61
choline acetyltransferase - subcellular distribution, 151
choline transport - in oocytes, 87
cholinergic receptors - in visual cortex, 143
cholinergic receptors - postnatal development, 143
cholinergic toxin - aziridinium ion, 113
cholinergic transmission - in Torpedo, 559
circadian variation - in spermine and spermidine, 605
convulsions - produced by kainic acid, 235
C-AMP formation - negatively coupled to 5-$HT_{1a}$ receptors, 407
C-AMP - facilitation of catecholamine release, 81
C-AMP - in catecholamine release, 71
C-AMP - inhibits $Na^+$, $K^+$-ATPase, 81

development - of neurotransmitter signals, 1
development - of neurotransmitters signals, 17
development - of Raphé neurones, 93
diacylglycerol - second messenger, 171
dibutyryl C-AMP - effect on morphology of cells, 255
dopamine release - effect of substance P, 367
dopamine release - from striatum, 367
dynorphin converting enzyme, 221

ecto-ATPase activity - in PC12 cells, 581
electromotoneuron - tubulin localisation, 355
encephalopathy - 2-oxglutarate dehydrogenase activity in subcellular sites of CNS, 578
encephalopathy - kainate and AMPA receptors in cerebellum, 511
energy metabolism - effect of ammonia, 495
ethanol - effect on $GABA_A$ receptor, 319
N-ethylmaleimide - stimulates serotonin and $^{86}Rb^+$ uptake, 531
expression of sodium dependent choline transport, 87

forskolin - elevation of $[Ca^{++}]_i$, 74

GABA receptors - 475
$GABA_A$ receptor complex, 319
$GABA_A$ receptor - effect of ethanol, 319
$GABA_A$ receptor - mRNA, 373
$GABA_A$ receptors - in cultures of cerebellar granule cells, 475
$GABA_A$ receptors - of high and low affinity, 475
$GABA_A$ receptors - regulate transmitter release, 475
$GABA_A$ - receptor $\alpha_1$ subunit, 373
gallamine - competition for acetylcholinesterase binding sites, 125
ganglioside pattern - in Rett Syndrome, 505
gangliosides GMI - modulates calmodulin-dependent protein kinase II, 271
gangliosides - in cerebellum of humans, 505
gangliosides - lacto series, 227
gangliosides - of astroglial cells, 227
gas chromatography-mass spectrometry - of neurotransmitter contents, 445
glucose-6-phosphate dehydrgenase - subcellular distribution, 151
glutamate transporter - age related change, 243
glutamatergic system - effect of antidepressants, 247
glycolipid - and acetylcholinesterase, 51
GR67330 - 5-$HT_3$ receptor ligand, 389

granule cells in culture - $GABA_A$ receptor-types, 475
granules - transport, 281

hemicholinium mustard, 113
hemicholinium mustard - effect nullified by monosialganglioside GM2, 113
histamine-N-methyltransferase - purification and characterisation, 135
histamine - inhibits release of serotonin and noradrenaline, 437
hypothalamic catecholaminergic mechanisms, 261
5-HT receptors - modelling studies, 397
$5\text{-}HT_{1a}$ receptor antibodies, 413
$5\text{-}HT_{1a}$ receptors - autoradiographic localisation, 453
$5\text{-}HT_{1a}$ receptors - in cerebellum, 425
$5\text{-}HT_{1a}$ receptors - in rabbit retina, 407
$5\text{-}HT_{1a}$ receptors - localisation, 425
$5\text{-}HT_{1a}$ receptors - localisation by *in situ* hybridization, 453
$5\text{-}HT_{1a}$ receptors - mRNA, 453
$5\text{-}HT_{1a}$ receptors - negatively coupled to C-AMP formation, 407
$5\text{-}HT_{1a}$ receptors - visualisation with antibodies, 413
$5\text{-}HT_{1c}$ receptor - mRNA localisation, 433
5-HT agonists - effect on transporter, 39
5-HT receptors - conformation/activity relationship, 397
5-HT receptor-subtype - mRNAs, 433
5-HT transporter, 39
$5\text{-}HT_3$ receptors - in ileum and brain, 389
$5\text{-}HT_3$ - receptors, 389

immunoautoradiogaphy - of $5\text{-}HT_{1a}$ receptors, 413
*in situ* hybridization - localisation of $5\text{-}HT_{1a}$ receptors, 453
inositol 1,4,5-triphosphate - second messenger, 171
inositol monophosphate levels - effect of $CO_2$ and low potassium, 327
inositol phospholipid breakdown, 207
inositol phospholipid turnover, 171
intracellular pH - effect of ammonia, 495

kainate receptors - in cerebellum of drugs with chronic hepatic encephalopathy, 511
$^3$H-kainate binding - in cerebellum, 511
kainic acid-induced convulsions, 235
kainic acid-induced convulsions - affect phorbol ester binding and protein phosphorylation, 235
Kappa opioid receptor - in frog brain, 349

liposomes - of phosphatidylserine, 611
*Locus coeruleus* - tyrosine hydroxylase concentration, 25

methylglioxal bis[guanylhydrazone] - 5-adenosymethionine decarboxylase inhibitor, 313
methylglioxal bis[guanylhydrazone] - effect on polyamine interconversion, 313
minaprine binding - autoradiographic studies, 335
minaprine - binds to voltage dependent potassium channel, 335
MK-801 binding - effect of antidepressants, 247
modelling - of $5\text{-}HT_3$ receptors, 397
modulation of neurotransmitter actions, 19
modulation - of receptor mediated events, 171

modulation - of receptor mediated events, 207
monoamines - effect on astrocytes, 6
monocular deprivation - effect on muscarinic receptors in visual cortex, 143
monosialganglioside GMI - protects lesions produced by hemicholinium mustard, 113
mRNA for pituitary protein 7B2 - reduced by castration, 103
mRNA - for $5\text{-HT}_{1a}$ receptors, 453
mRNA - for pituitary protein 7B2, 103
mRNA - of $GABA_A$ receptors, 373
mRNAs - of different 5-HT receptor-types, 433
μ-opioid receptor activator - inhibits release of acetylcholine, 543
μ-opioid receptor activator - inhibits release of noradrenaline, 543
μ-opioid receptors - modulation of neurotransmitter release, 543
μ opioid receptopr - in frog brain, 349
muscarinic receptors - in visual cortex, 143
muscarinic receptors - postnatal development, 143

NAAG - see N-acetyl-aspartyl-glutamate, 593
$Na^+$, $K^+$-ATPase - inhibition by C-AMP, 81
neurones - effect of protein kinase C, 93
neuroendocrine functions - involvement of neuropeptide Y, 261
neurohypophysis - oxytocin-neurophysin processing, 297
neuronal cultures - uptake of sulphur-containing amino acids, 467
neuropeptide converting enzymes, 221
neuropeptide Y receptors, 261
neuropeptide Y receptors - involvement in hypothalamic catecholamine systems, 261
neuropeptide Y receptors - involvement in neuroendocrine functions, 261
neurophysin - processing in neurohypophysis, 297
neurotransmitter content - gas chromatography/mass spectrometry, 445
neurotransmitters - as development signals, 1
neurotransmitters - quantification, 445
NG 108-15 cells - effect of dibutyryl C-AMP and phorbol esters, 255
nimodipine - in studies on serotonin and noradrenaline release, 437
NMR - ammonia neurotoxicity, 495
noradrenaline release - from rat amygdala slices, 543
noradrenaline release - inhibition by 5-HT and histamine, 437
noradrenaline - content in postnatal period, 61
noradrenaline - in cerebellum, 61
noradrenaline - induced by x-irradiation, 61
p-nitrophenyl phosphorylcholine-hydrolysing phosphodiesterase - released by phospholipase C, 523
nuclear magnetic resonance spectroscopy - see NMR, 495

ontogeny - of thiamine pyophosphatase, 33
opioid receptors - effect of 5'-guanylimidodiphosphate, 349
2-oxoglutarate dehydrogenase activity - effect of ammonia, 573
2-oxoglutarate dehydrogenase activity - in cerebellum from encephalopathy rats, 573
2-oxoglutarate dehydrogenase activity - in subcellular sites of cerebellum, 573

oxytocin - processing in neurohypophysis, 297

paroxatine - binding, 42
PC12 cells - ecto ATP-ase activity and phosphorylation, 581
peptide - processing, release, compartmentation, 281
phorbol ester binding - effect of kainic acid-induced convulsions, 235
phorbol ester binding - to protein kinase C, 235
phorbol esters - effect on morphology of cells, 255
phorbol esters - effect on serotonin uptake, 99
phosphatidylinositol - involvement in acetylcholinesterase, 51
phosphatidylserine liposomes - fusion with synaptosomes, 611
phosphoglucose isomerase - subcellular distribution - 151
6-phosphogluconate dehydrogenase - subcellular distribution, 151
phosphoinositide cycle, 171
phospholipase C - releases enzyme, 523
phosphorylation - efect of kainic acid-induced convulsions, 235
pituiary protein 7B2 - mRNA, 103
polyamine interconversion - effect of methylglioxal bis[guanylhydrazone], 313
polyamine - interconversion in retina, 313
polyamines circadian variations, 605
postnatal development - of muscarinic receptors, 143
postnatal development - of pyruvate dehydrogenase, 549
post-translational processing of retinal proenkephalin, 483
potassium - elevation of $[Ca^{++}]_i$, 74
potassium - effect on inositol monophosphate levels, 327
potassium channel - binding of minaprine, 335
proenkephalin - effect of light and dark in chicken retina, 483
proenkephalin - in light and dark adapted retinas, 483
protease activity - associated with acetycholinesterase, 537
protein kinase C - binding of phorbol esters, 235
protein kinase C - involvement in development of neurones, 93
protein synthesis - regulation, 601
pyruvate dehydrogenase - phosphorylation, 549
pyruvate dehydrogenase - postnatal development, 549
pyruvate dehydrogenase - subcellular, 151

R424722 - effect on tyrosine hydroxylase, 25
radioimmunoassay - of calretinin, 517
Raphé neurones - development, 93
Raphé neurones - in culture, 93
$^{86}Rb^+$ uptake into platelets - stimulated by N-ethylmaleimide, 531
receptor crosstalk, 171
receptor desensitization, 171
receptor modelling - of 5-HT receptors, 397
receptors - $5\text{-}HT_3$ subtype, 389
receptors - linked to inositol phospholipid breakdown, 171
receptors - linked to inositol phospholipid breakdown, 171
receptors - linked to inositolphospholipid breakdown, 207
release - of enzymes caused by phospholipase C, 523
retina - proenkephalin metabolism, 483
retina - polyamines, 313
Rett Syndrome - altered ganglioside patterns, 505
ribosome content - during development, 601
RU 24969 - action on 5-HT transporter, 39

secretory granules - transport, 281

sensorimotor cortex lesions - effect on distribution of N-acetyl-aspartyl-glutamate, 593
serotonin uptake - effect of phorbol esters, 99
serotonin receptor heterogeneity, 433
serotonin release - inhibition caused by serotonin and histamine, 437
serotonin uptake into platelets - stimulated by N-ethylmaleimide, 531
serotonin - inhibits release of serotonin and noradrenaline, 437
signals - in development, 1
sodium-dependent choline transport, 87
spermidine content - circadian variation, 605
spermine concentration - circadian variation, 605
substance P endopeptidase, 221
substance P - effect on dopamine release, 367
sulphur-containing amino acids - 467
susbtance P - fragmentation, 341
synaptosomes - fusion with phosphatidylserine liposomes, 605
synthesis of retinal proenkephalin, 483

tacrine - competition for acetylcholinesterase binding sites, 125
temporal integration - of neurotransmitters, 17
tetrahydrobiopterin levels - effect of tryptophan, 363
TFMPP - effect on 5-HT transporter, 39
thiamine pyophosphatase - purification and distribution, 33
thiamine pyrophosphatase - in brain, 33
Torpedo - tubulin in electromotoneurons, 355
toxins - hemicholinium derivatives, 113
transketolase - subcellular distribution, 151
transport - of secretory granules, 281
transporter - of 5-HT, 39
tryptophan - effect on tetrahydrobiopterin levels, 363
tubulin - in electromotoneurones, 355
tyrosine hydroxylase - effect of R424722
tyrosine hydroxylase - in Locus coeruleus, 25

uptake - of n-butyl-β-carboline-3-carboxylate, 567
uptake - of sulphur-containing amino acids, 467

vesamicol - effect on acetylcholine metabolism, 559
visual cortex muscarinic receptors - effect of monocular deprivation, 143

Xenopus oocytes - injection of poly A(+) mRNA, 243
x-irradiation - effect on noradrenalne content, 61

PRINTED BY BPCC-AUP ABERDEEN LTD
